

More than 2000 DDoS attacks every day!
An outage can cost you more than \$1 million!**

To:	CIO; CTO; DBA
Cc:	Board of Directors
Subject:	Meeting Invitation: Recent DDoS Attack & Database Outage

This email can be avoided!

- Outages jeopardize your revenues, business & user productivity, brand image & your customers' loyalty.
- You already protect your media using a CDN. What about your most important asset - Enterprise Data?
- DDoS attacks are getting more sophisticated, bigger in scale & more costly.

We can help you achieve it all with the
the lowest-latency data delivery network.

Request a Demo of Xylem Shield on
www.apakau.com

Business Benefits:

Enhance Database Uptime & Reliability

- Protect your database from DDoS attacks
- Reduce the risk of outages & downtime
- Manage traffic using geo-IP filtering in the control center
- Maintain data load speed with concurrent user queue management
- End-to-end encryption
- Actively Managed DDN is more secure than in-house security

Preserve Your Brand & Image

- Save your brand the risk of outages & DDoS attacks
- Keep users satisfied & maintain their loyalty

Easy to Use

- Xylem easily integrates with your own (or cloud-hosted) databases
- Develop your websites & mobile apps faster using APIs

For database latency,
check out our solution Xylem Edge.

Apakau - based in San Francisco, CA - is a Data Delivery Network (DDN) that helps businesses around the globe securely deliver data from/to their geo-distributed web and mobile apps at unmatched latency and maximum protection against database DDoS attacks.
